SIP Phone T73U

Ringing in the smart zone with a new desk phone, the Yealink SIP Phone T73U features an all-new fashionable design with a slimmer body, a vibrant color display, and touchable buttons that perfectly fit into your modern workspace. Designed for a comfortable hand feel, this IP phone combines a streamlined, smarter user experience with pristine audio quality. Bolstered by Yealink's advanced "Three Rings of Security," the T73U provides a highly secure, intuitive, and efficient desktop communication solution to help you lead boldly in your daily work.

Key Benefits

User Friendly

- Fashionable Design and Smarter UX
- Features a streamlined, intuitive user interface with clear icons and soft keys for easy access to advanced functionalities.
- Offers modern display options, including an Accessibility Mode and the ability to seamlessly toggle between Light and Dark themes for a customized, user-friendly experience.
- Designed with an all-new slim body, touchable buttons, and a stand with two adjustable angles to ensure optimal viewing and a comfortable feel.
- Includes convenient LED indicators for instant call and message waiting alerts.

Clean Sound, Clear Calls

- Equipped with a powerful 3W speaker to deliver robust, high-quality audio output.
- Utilizes Yealink's advanced Smart Noise Filtering and Optimized Acoustic Shield technologies to drastically reduce background distractions and ensure your voice is crystal-clear.
- Provides comprehensive audio enhancements for professional-grade, seamless conversations in busy office environments.

Shield Strong, Stay Safe (Three Rings of Security)

- Ensures total device integrity from startup to operation utilizing a Trusted Execution Environment, secure boot integrity verification, firmware encryption, and signature certificates.
- Safeguards your network connections against intrusions and attacks using 802.1X authentication, WPA3 encryption, and robust content security policies that block script input injections and cross-site attacks.
- Keeps your communications, signaling, media, and user data entirely safe in transit and at rest through TLS 1.3, strong cipher suites, SRTP media protection, and encrypted configuration files.
