SIP Phone T74W

Ringing in the smart zone with a new desk phone, the Yealink SIP Phone T74W features an all-new fashionable design with a slimmer body, dedicated line keys, and touchable buttons that perfectly fit into your modern workspace. Highlighting a spacious 4.3-inch display, this IP phone combines a streamlined, smarter user experience with pristine audio quality. What sets the T74W apart is its advanced wireless connectivity, boasting built-in Bluetooth 5.0 and Wi-Fi 6.0 to give you ultimate flexibility. Bolstered by Yealink's advanced "Three Rings of Security," the T74W provides a highly secure, intuitive, and efficient desktop communication solution to help you lead boldly in your daily work.

Key Benefits

User Friendly

- Features a vibrant 4.3-inch 480x272 resolution screen and a streamlined, intuitive user interface with clear icons and soft keys.
- Modern display options, including an Accessibility Mode and the ability to seamlessly toggle between Light and Dark themes for a unified, user-friendly experience.
- New slim body, dedicated line keys, touchable buttons, and a stand with two adjustable angles to ensure optimal viewing and a comfortable feel.
- Includes convenient LED indicators for instant call and message waiting alerts.

Connect Fast, Link Freely

- Equipped with the latest built-in Bluetooth 5.0 and Wi-Fi 6.0 for superior device coordination and highly flexible network connections.
- Supports a "close-to-pair" feature, allowing you to instantly connect your Bluetooth headset without the hassle of navigating menus.
- Easily expandable, supporting USB headsets, EHS, and color-screen expansion modules to accommodate busy workflows.
- Equipped with a powerful 3W speaker to deliver robust, high-quality audio output.
- Utilizes Yealink's advanced Smart Noise Filtering for intelligent noise cancellation, creating an uninterrupted communication environment.
- Features Optimized Acoustic Shield and comprehensive audio enhancements to ensure your voice is crystal-clear in busy office settings.

Shield Strong, Stay Safe (Three Rings of Security)

- Ensures total device integrity from startup to operation utilizing a Trusted Execution Environment, secure boot integrity verification, firmware encryption, and signature certificates.
- Safeguards your network connections against intrusions and attacks using 802.1X authentication, WPA3 encryption, and robust content security policies that block script input injections and cross-site attacks.
- Keeps your communications, signaling, media, and user data entirely safe in transit and at rest through TLS 1.3, strong cipher suites, SRTP media protection, and encrypted configuration files.
