W79P DECT Phone System

Designed for challenging and demanding environments, the Yealink W79P DECT Phone System combines the professional, ruggedized W59R handset with the high-performance W70B base station. Certified to a rigorous IP67 rating, this system is perfectly qualified to handle dusty, humid, and harsh workspaces while providing a premium, distraction-free voice communication experience. Seamlessly compatible with Yealink's full range of DECT endpoints and supporting the Microsoft SIP Gateway, the W79P delivers robust processing capacity for up to 10 SIP accounts and 20 simultaneous calls. With integrated Bluetooth, a vibration alarm, and specialized emergency response functions, it is the ideal wireless communication solution for small- and medium-sized businesses needing reliable mobility in tough conditions.

Key Benefits

User Friendly

- High-Performance and Efficient Network
- Supports registration for up to 10 Yealink W59R DECT handsets, effortlessly handling up to 10 SIP accounts and 20 simultaneous calls.
- Enhances flexibility and mobility by allowing the addition of up to 6 optional DECT repeaters for significantly extended network coverage.
- Supports the Microsoft SIP Gateway and is seamlessly compatible with Yealink's full range of DECT endpoints for a highly adaptable business solution.

Protective & Considerate Solution for Challenging Environments

- Features the professional W59R ruggedized handset, certified to an IP67 rating to withstand drops, dust, and humid or harsh environments.
- Includes integrated Bluetooth for easy wireless headset pairing and a vibration alarm to ensure calls are noticed even in extremely noisy workspaces.
- Equipped with a series of implanted smart alarm functions designed to help report emergencies and minimize safety risks for isolated or mobile workers.

Reliable & Distraction-Free Audio

- Powered by the enhanced processing capability of the W70B base station, embracing cutting-edge wireless communication technologies.
- Delivers premium, high-quality audio performance, ensuring stable and clear voice communication even in complicated or impressionable environments.

Efficient Installation and Management

- Streamlines provisioning and mass deployment using Yealink's Redirection and Provisioning Service (RPS) and Boot mechanism to avoid complex manual settings.
- Facilitates easy remote deployment, ongoing maintenance, and upgrades to significantly save on labor and time costs.
- Utilizes a newly designed web portal for device management, bringing a clear and intuitive interface that greatly upgrades the user/administrator experience.

Key Features

- Professional ruggedized DECT handset with an IP67 protection rating (water, dust, and drop resistant)
- Built-in Bluetooth for wireless headset connectivity
- Built-in vibration alarm for noisy environments
- Integrated emergency alarm functions (such as push-button and motion-based alarms)
- Up to 20 simultaneous calls
- Up to 10 DECT cordless handsets per base station
- Up to 10 VoIP accounts
- Premium HD audio quality with advanced noise reduction
- Support for Microsoft SIP Gateway
- Expandable network coverage with up to 6 optional repeaters
- Effortless mass deployment and remote management capabilities
